DETAILED ACTION

Claims 7,21,29,39,43,44,and 48 remain pending

Response to Arguments

The applicants arguments filed on July 22,2005 have been fully considered.

The the previously indicated allowability of claim 29 has been withdrawn in reconsideration of the reference to Pare, Jr et al (US Patent 6,230,148).

See following rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pare, Jr et al (US Patent 6,230,148) in view of Pollin (US Patent 5,727,249).

As per claim 29,

Pare Jr. et al. ('148) discloses an apparatus comprising one or more computers capable of executing one or more programs to electronically clear and cash a check submitted to an on-line accepting an input of check information submitted by consumer;(Figure 7)

verifying the accuracy of the check information; verifying the check information to ensure that the bank routing number is valid and correct (column 8, lines 41-46)

presenting the check information for clearing through the Federal Reserve's Automated Clearing House;(column 11, lines 38-45)

debiting the consumers checking account from which the check was drawn in an amount indicated in the check information;(column 4, lines 57-59)

crediting the merchant's account in the amount indicated in the check information.(column 4, lines 59-61)

Pare Jr. et al. ('148) does not specifically disclose if the routing number provided by the consumer is a correct paper routing number but not a correct electronic routing number, the check information is modified to substitute the correct electronic routing number for the paper routing number provided by the consumer. Pollin ('249) discloses if the routing number provided by the consumer is a correct paper routing number but not a correct electronic routing number, the check information is modified to substitute the correct electronic routing number for the paper routing number provided by the consumer. (Column 9, lines 37-59) It would be obvious to one having ordinary skill in

Art Unit: 3621

the art of electronic banking at the time the invention was made to combine the Pare Jr. et al. ('148) method with the Pollin method in order to maximize the likelihood of funds recovery.

Allowable Subject Matter

Claims 7,21,39,43,44, and 48 are allowed.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
